Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	10/600,754	LIAO, CHENG CHOU	
	Examiner Anabel M. Ton	Art Unit 2875	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 29 November 2004.
 2a) This action is FINAL. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-10 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) Claim(s) _____ is/are allowed.
 6) Claim(s) 1-10 is/are rejected.
 7) Claim(s) _____ is/are objected to.
 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.
 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) Notice of References Cited (PTO-892)
 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
 Paper No(s)/Mail Date _____.

4) Interview Summary (PTO-413)
 Paper No(s)/Mail Date. _____.
 5) Notice of Informal Patent Application (PTO-152)
 6) Other: _____.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wood and further in view of Molinaroli (6,265,984).

Wood discloses the claimed invention except for the recitation of two illuminating tubes (as opposed to one) with a sealing means. Wood discloses an illuminated skateboard with a string of LED's embedded in the periphery of the skateboard and a control box being provided on the underside of the skateboard. The peripheral groove around the entirety of the skateboard is filled with a continuous string of LED's which are covered with resin or hot injected glue (col. 1 lines 35-39), each embedded LED string being disposed in a groove. Molinaroli discloses an LED lighting system for use in multiple applications, mainly attaching to objects, the LED lighting system with a long wire lead are put into clear shrink tubing lined with a sealant. The shrink tubing is heated until it shrinks and permanently seals the tubing (col. 18 lines 1-3, 27-34). With

regards to the multiplicity of tubes, It would have been obvious to one of ordinary skill in the art at the time the invention was made to use two LED strips instead of one in the device of Wood since it has been held that mere duplication of essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

3. With regards to the LED's encased in a sealed tubing, it would have been obvious to one of ordinary skill in the art at the time the invention was made to implement the teaching of a sealed tubing in the device of Wood (instead of sealing the LED string in resin) since as taught by Molinaroli, such a practice is purposeful to prevent damage by environmental elements to the lighting device.

- With regards to the recitation of dust covers as a sealing means, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use front and rear covers to seal off a tubing from dust since such a practice is old and well known in the art for preventing environmental damage to the lighting device and for facilitating accessibility to the lighting device when necessary (see cited prior art Bodell et al for teaching);
- The tubes are flexible and impact resistant (Molinaroli)
- A skateboard comprising a board, at least one hollow generally cylindrical transparent tube attached to the side of the board and a plurality of light emitting elements disposed inside the transparent tube (above rejection applies);
- A conductor operatively connecting the light emitting elements to the control box (Wood)
